

# Davis Square Streetscape Improvements

## Design Principles

- Improvements to the Square will bring greater clarity, flow and safety to all users: pedestrians, bicyclists, and drivers.
- Improvements will further expand opportunities to strengthen community use.
- Improvements will strengthen the identity of Davis Square.

## Design Objectives

- Provide a balanced approach to all modes of transportation: bicycle, pedestrian, vehicle
- Minimize conflicts between various modes of transportation: bicycle, pedestrian, vehicle
- Provide safe crossings and address accessibility issues
- Provide clarity through wayfinding and clear markings as well as safe and sensible path of travel routes
- Better provide for pedestrian use through open space/plaza opportunities as well as sidewalk improvements
- Provide amenities for pedestrians and bicyclists
- Respect parking needs of local businesses
- Develop coherent and distinct palette of materials – pavements, furnishings, lighting, wayfinding
- Better define Davis Square entrances
